## A convenient, versatile, and easy-to-use nonverbal assessment of ability

The Raven's® 2 provides a nonverbal measure of high-level observation skills, clear-thinking ability, and intellectual capacity that minimizes the impacts of language and cultural differences. This test differentiates between people at the high end of intellectual ability with more difficult items and also offers a set of items applicable at any ability level including the low end of intellectual ability.

### Content & Administration

The globally regarded Raven's assessment has undergone some major improvements including a new digital option! You now have the choice between traditional paper or digital administration through Q-global®. The Raven's 2 uses familiar technology designed to put examinees at ease while reducing inventory concerns and test kit transport. The Raven's 2 can be used in a variety of settings, with culturally diverse populations, and/or with nonverbal children beginning with age four and adults up to age 90. The Raven's 2 can be administered fairly to virtually everyone, including those who are not language proficient or have communication-related disabilities. After completing the assessment, the administrator receives a standard score as well as a percentile rank based on norms collected from the general population.
