Clinical Evaluation of Language Fundamentals

# Tap into the X factor

Nothing can beat the thrill of seeing a student experience a breakthrough moment. The CELF<sup>®</sup>-5 can help you discover the X factor in each of your students — those hidden strengths that you can bring forth to make more “aha” moments happen.

Building on the gold standard in language assessment that SLPs have trusted for more than 25 years, the new CELF-5 makes it easier than ever for you to diagnose language disorders and design individualized assessment and intervention plans. Based on the latest research, the CELF-5 includes significant enhancements to assist you in helping students achieve their best in today's world.

## **Excellent flexibility and usability**

- The CELF-5 offers streamlined administration, providing a battery of 16 stand-alone tests.
  - Complete the Observational Rating Scales to identify situations in which poor language skills are evident. Strategize ways to improve classroom performance.
  - If the student doesn't make progress, conduct a diagnostic assessment with the CELF-5; administer only the tests you need to answer referral concerns.
- For added convenience, all verbal stimuli and item analyses now appear in the Record Form.

## **Expanded pragmatics tests**

The CELF-5 features a robust assessment of social language skills that is observation-based, unlike many other pragmatics tests.

- With the Pragmatics Profile, obtain information about a student's verbal and nonverbal behaviors from teachers or parents.
- Use interactive communication activities and the new Pragmatics Activities Checklist to identify behaviors that cause the student difficulty in everyday social interactions.

## **Examination of reading and writing**

Two new tests in the CELF-5 help you conduct a targeted assessment of written language.

- Quickly evaluate reading comprehension and writing skills with just two tests.
- Compare written language skills to oral language performance.

## **Extra convenience with Digital Kit option**

Take advantage of the new CELF-5 Digital Kit, an option that increases portability and enables you to administer the test from your desktop or laptop.

- All manuals are delivered on a flash drive.
- A full set of paper Record Forms, Reading and Writing Supplements, and Observational Rating Scales are included in the kit.

# CELF-5 Test Battery

Language Content	Language Structure	Oral-Written Language Connection	Pragmatics	Language Memory
Linguistic Concepts	Sentence Comprehension	Understanding Spoken Paragraphs	Pragmatics Profile	Linguistic Concepts
Word Classes	Word Structure	Reading Comprehension	Pragmatics Activities Checklist	Following Directions
Following Directions	Formulated Sentences	Formulated Sentences		Recalling Sentences
Semantic Relationships	Recalling Sentences	Structured Writing		Formulated Sentences
Word Definitions	Sentence Assembly	Observational Rating Scales		
Understanding Spoken Paragraphs				

## Exceptional tool for universal screening

The CELF-5 Screening Test is ideal for universal screening of students ages 5 and 6 and for individual screening of students through age 21. Rely on this up-to-date tool to help you quickly determine if your student needs further assessment to identify a language disorder.

### Exciting benefits

- *Now includes a pragmatics screening task*, in addition to items that help you screen morphology, syntax, and semantics.
- *Saves you time*, with administration and scoring taking only 15 minutes.
- *Reduces administration time for follow-up testing with the CELF-5*; screening items are a subset of the diagnostic CELF-5, so that you can simply transfer screening test responses to the CELF-5 protocol.
- *Enables cost-effective universal screening* for children in Kindergarten round-up.
- *Can be used with students through age 21*, providing the only screening measure with research-based criterion scores for older school-age students.
- *Presents research-based criterion scores* based on a standardization sample of more than 2,000 students throughout the United States.
