

Bayley™-III vs. Bayley™-4: *What's changed?*

Administration & Scoring	
<ul style="list-style-type: none"> • Flexible administration with Series Items noted on the record form • Motor response items embedded in the record form • Dichotomous scoring approach (i.e., 1, 0) 	<ul style="list-style-type: none"> • Flexible administration with Series Items and Related Items identified on the record form and supported via digital administration • Motor response items in a separate Motor Response booklet • Structured caregiver questions to support administration on relevant items • Polytomous scoring approach (i.e., 2, 1, 0)
Content Updates	
<ul style="list-style-type: none"> • Assesses 5 domains: Cognitive, language, motor, social-emotional and adaptive behavior • Adaptive behavior content from the Adaptive Behavior Assessment System - Second Edition (ABAS-II) 	<ul style="list-style-type: none"> • Retains 5 domains: Cognitive, language, motor, social-emotional and adaptive behavior • Adaptive behavior content from the Vineland Adaptive Behavior Scales-Third Edition (Vineland-3) • Updated item content based on research and user feedback
Norms and Clinical Studies	
<ul style="list-style-type: none"> • Data collected 2001–2002 	<ul style="list-style-type: none"> • Data collected 2017–2019 • Updated reliability and validity studies
Administration Time	
<ul style="list-style-type: none"> • Completion Time: 30 to 90 minutes (depending upon age of child) • Adaptive behavior scale contains 241 items for caregiver response 	<ul style="list-style-type: none"> • Completion Time: 30 to 70 minutes (depending upon age of child) • Adaptive behavior scale contains 120 items to reduce the caregiver administration time

Digital Delivery

- | | |
|--|--|
| <ul style="list-style-type: none">• Software-based scoring and reporting assistant available | <ul style="list-style-type: none">• Web-based administration, scoring, and reporting via Q-global• Social-Emotional and Adaptive Behavior Questionnaire has remote administration option via Q-global |
|--|--|

The key benefits of the digital delivery option:

• Customization

- Adjust start point based on estimated due date if child was premature

• Flexibility

- No need for a separate record form or administration manual
- Supports non-linear and related-items administration

• Ease of use

- Messaging included to guide establishing basal and meeting discontinue rules
- Contains visual representation of administration directions and examples for complex items
- All series items are simultaneously scored based on a single response

• Accuracy

- A review screen helps to ensure all required data is captured prior to submitting the assessment
- Item score suggestions are provided based on when the timer is stopped or the number of correct responses to trials
